

ATRIUM[®]

WINDOWS AND DOORS

For decades, our partners have counted on Atrium for dedicated service, exceptional quality and innovative, customer-driven product design.

While our competitors assemble windows using materials from outside companies, Atrium controls almost every step in our supply chain, from in-house blending to extruding our own vinyl to manufacturing screens, reinforcement and insulated glass panels. This allows us to ensure the highest quality as well as competitive pricing for every window and door we produce.

And with industry-leading customer service and field service, we're more than a window fabricator—we provide the window *systems*, programs and services a distributor needs to exceed customers' expectations every time.

A HISTORY

BUILT ON PARTNERSHIPS

Since we opened our doors as a manufacturer of aluminum storm products in 1946, our commitment has been to provide our partners with great building products.

As we've grown to become one of the largest manufacturers of vinyl and aluminum windows and doors in North America, we've never lost sight of that original commitment to form real partnerships based on trust in a great product.

We owe our growth and success over the years to the partnerships we've formed with customers who prefer quality construction, operational excellence and superior customer service.

1946

We control every stage of manufacturing, starting with the highest-grade virgin vinyl compound.

Our formula is a computer-controlled blend of premium ingredients for consistent color and maximum weatherability.

We keep our facility updated with leading-edge technology, including European equipment and extrusion dies.

WE STAND BY OUR WINDOWS

FROM START TO FINISH

Atrium Windows & Doors is one of the most vertically integrated window and patio door manufacturers in the world. We maintain complete control of our manufacturing processes, and we produce nearly every component of our windows and doors, from vinyl and aluminum extrusions to in-house manufacturing of screens and insulated glass panels. Controlling the entire supply chain allows us to offer you the highest quality windows at fair and competitive prices.

Our high capacity, state-of-the-art vinyl extruders operate smoothly in a clean, isolated environment.

Because we design our products in-house, we can incorporate customer input into innovative new window systems.

Full vertical integration ensures that our products are of the highest quality and readily available to ship when customers need them.

CUSTOMER SERVICE

TO THE HIGHEST DEGREE

When you choose Atrium, you're choosing a tradition of world-class service that has been at the core of our business for more than 60 years.

With an average 10-year tenure, our customer service associates are the best in the industry.

They're available by hotline, fax or email to answer any questions about selecting, ordering, installing or maintaining Atrium windows. They can also provide quotes, order and ship replacement parts or dispatch field technicians to your customers' homes as needed.

Phone: 1-800-846-9556

Fax: 1-800-522-3981

Email: service@atriumwindows.com

Atrium Assurance

All Atrium products are backed by a limited lifetime warranty and include specific warranty ID numbers on each product, should replacement parts ever be needed. All replacement window warranties are transferable with a lifetime glass breakage warranty available.

Please see each window and door warranty for complete details.

DRIVEN BY OPERATIONAL EXCELLENCE

Quality Assurance

Because we control manufacturing from extrusion to fabrication, we're able to enforce our rigorous quality standards at every stage of the process.

With built-in quality assurance for every component of every window produced, you can feel confident that your Atrium windows are of the highest quality, from the inside out.

Consistent Delivery

Our commitment to be the best follows every order to the point of delivery, with a consistent one-week delivery cycle all year long. Atrium long-haul trucks are also equipped with GPS technology to make certain orders arrive on schedule.

IN THE LAST YEAR:

99.9%

of orders were delivered without a back order

99.5%

of orders arrived with no missing products,
no back orders, no damage

99%

of orders arrived the day of the appointment

97.3%

of orders arrived within 2 hours of specified time

Our online quote and order system, WindowWizard, was the first of its kind, and it continues to be the fastest and most comprehensive online system in the industry.

With instant pricing, visual confirmations and real-time monitoring, WindowWizard makes it easy to help your customers find, select and order high-quality windows and patio doors.

ADVANCED TECHNOLOGY MEETS SUPERIOR CUSTOMER SERVICE

Versatile Quoting and Ordering

Generate quotes and place orders any time and anywhere you have Internet access, 24 hours a day.

Real-time Order Management

Check the status of an order or field service job at any point in the process, from planning to delivery. You can also make global changes to an entire order—add or eliminate options, change quantities, and more—with just a few clicks.

True Graphics

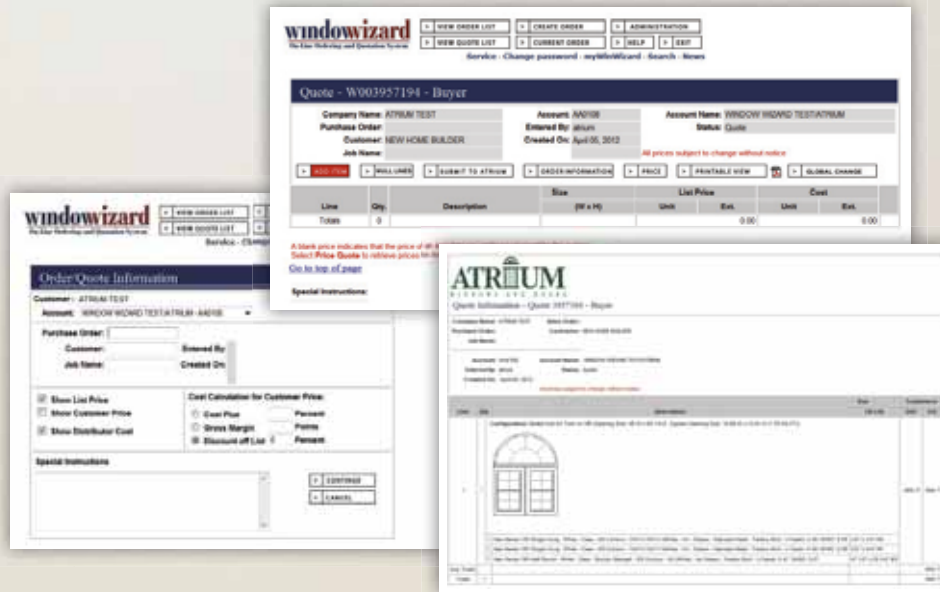

Help your customers visualize their orders with accurate representations of most window and grid configurations. You can also format and print professional quotes that include product graphics and your (or a dealer's) logo.

Complete Details

With detailed technical and marketing information for each window and door, you can be sure each item you order will meet your customers' needs.

Details include:

- + DP rating
- + Thermal performance values
- + Egress
- + Energy Star compliance by zone

SIMPLE, EFFECTIVE

CUSTOMER EDUCATION

Our marketing objective is simple: to help our customers become confident in their purchases by providing comprehensive information through friendly, straightforward messaging.

atrium.com

The Atrium website is designed to introduce customers to our company and our products, and to provide helpful information on general window features through a detailed FAQ and glossary of technical terms.

We market Atrium products through the website and social media profiles as well as printed materials so that customers can find information in the medium of their choice.

ATRIUM WAS A GREEN COMPANY

LONG BEFORE “GREEN” WAS A DESIGNATION

We filter and recycle all water used in the extrusion process, and even our glass components are made from up to 28 percent reclaimed glass. We also recycle our high-grade vinyl scrap into single wall accessory profiles such as sill angles and head expanders.

Our environmentally sensitive manufacturing process and recycled content allow us to reduce our impact on the environment—and keep costs low for our customers.

Greener Choices for More Efficient Homes

We've made it our company philosophy to provide our customers with energy efficient, maintenance-free products that help to lower their energy bills.

All of our products are available with Energy Star qualified options in each zone—and customers can select additional thermal enhancing options for added efficiency.

Visit the Efficient Windows Collaborative at www.efficientwindows.org and Cardinal Glass at www.cardinalcorp.com for calculation tools that estimate what customers can save in power consumption costs.

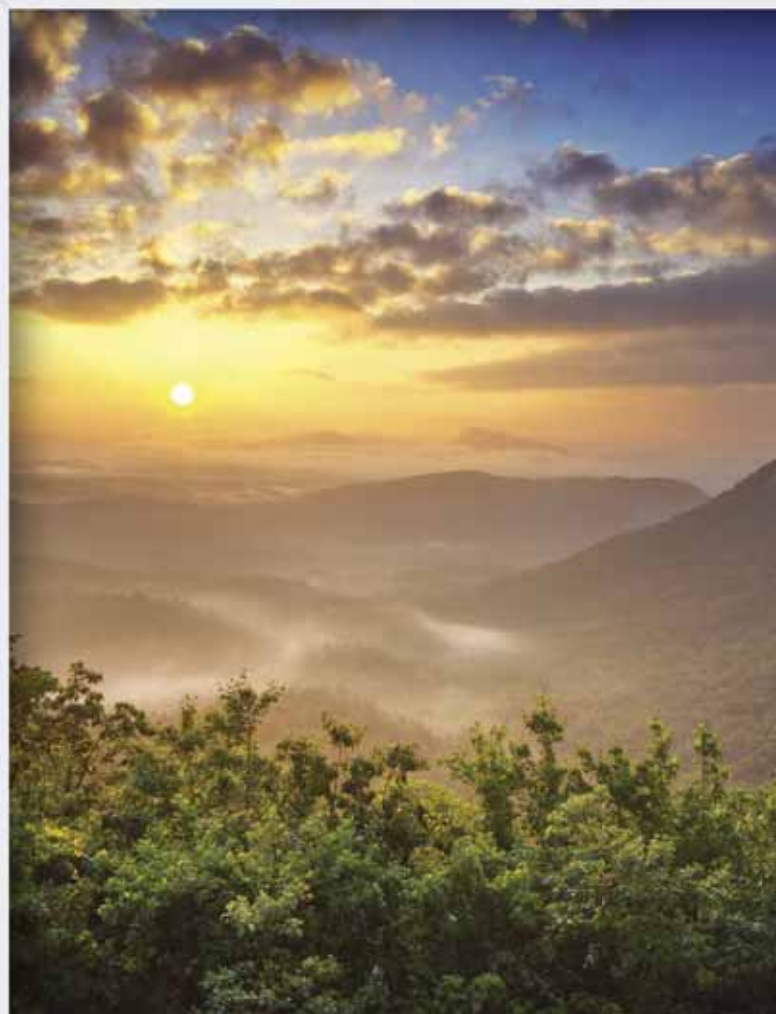

Atrium energy-saving features include:

- + Low-E glass
- + Ultra Low-E glass
- + Triple-paned Low-E/Argon or Ultra Low-E/Argon glass panels
- + R-5 thermal performance
- + Insulating argon gas
- + Warm-edge insulated glass sealant systems
- + Aluminum-reinforced, multi-cavity construction
- + Fusion-welded sashes and frames
- + Dual-fin weather stripping

The Atrium Series 8900 window offers triple-pane glass with Super Spacer® nXt™ and foam frame filling options for maximum R-5 compliance and optimal energy savings.

From our sturdy Series 8100 single hung windows to the deluxe features and extensive options on our Series 8900 double hung windows, we've designed our line of replacement windows to fit any application, level of energy efficiency and budget a homeowner could have.

VINYL REPLACEMENT WINDOWS

PUTTING HOMES IN A NEW LIGHT

To help your customers select the windows that best match their needs and ideal budgets, our replacement windows operate on a good/better/best system. While our “best” window offers top-of-the-line design, strength and efficiency, even our most affordable model is loaded with features to ensure high performance and lasting durability.

EXCEPTIONAL DESIGN

AND A WIDE ARRAY OF OPTIONS

Shapes and Styles

Help your customers create impressive window designs with our full assortment of complementary styles and specialty shapes for replacement windows.

Complementary styles include bays and bows, casements, awnings, sliders and garden windows.

And for window designs that make a truly unique statement, specialty shapes are available, including full round, half round, octagon, trapezoid and triangle.

InsulKor™ Technology

Standard on the Series 8900, our exclusive InsulKor fiberglass-enriched polyurethane sash reinforcement is as rigid as aluminum, but insulates as well as premium vinyl.

Optional InsulKor multi-cavity foam-filled frame option allows even greater thermal performance on Series 8900 windows.

8050

The 8050 Side-Load Single Hung is Atrium's most economical. The 8050 offers a sweep lock, built-in accessory channels and modular sizing.

8100

The Series 8100 single hung window delivers straightforward functionality, high-quality construction and warm-edge glass technology at an attractive price.

8300

The workhorse of our replacement window series, Series 8300 double hung windows offer advanced stability and insulation features, including reinforced multi-cavity construction, constant force coil balances, and fusion-welded sashes and frames.

8700

Series 8700 double hung windows feature optimal thermal performance and classic design features from a warm-edge sealant system to stylish beveled exteriors, an expanded selection of performance and cosmetic upgrades, and a 25-year glass breakage warranty.

8900

The Series 8900 double hung window offers maximum stability, optimal thermal efficiency and deluxe design options. Features include an exclusive InsulKor™ fiberglass-enriched polyurethane frame, a 3/4" coil balance, optional triple-paned R-5 compliant glass, a multi-cavity foam-filled frame, and a lifetime glass breakage warranty as standard.

+ COLOR OPTIONS*

Available with Series 8900 windows, casements, awnings, bays and bows

White	Almond	Hunter Green**	Dark Chocolate**	Terratone**	Clay**	Brick Red**
Gray**	Bronze**	Tan**	Light Oak	Dark Oak	Cherry	

Printing process may affect color shown. Please refer to actual window sample when selecting colors.

With beautiful brick mould exteriors and all-welded sashes and frames, Atrium windows for new construction are designed for good looks, easy installation and enduring, superior performance.

VINYL WINDOWS FOR NEW CONSTRUCTION

FOR NEW HOMES WITH BRIGHT FUTURES

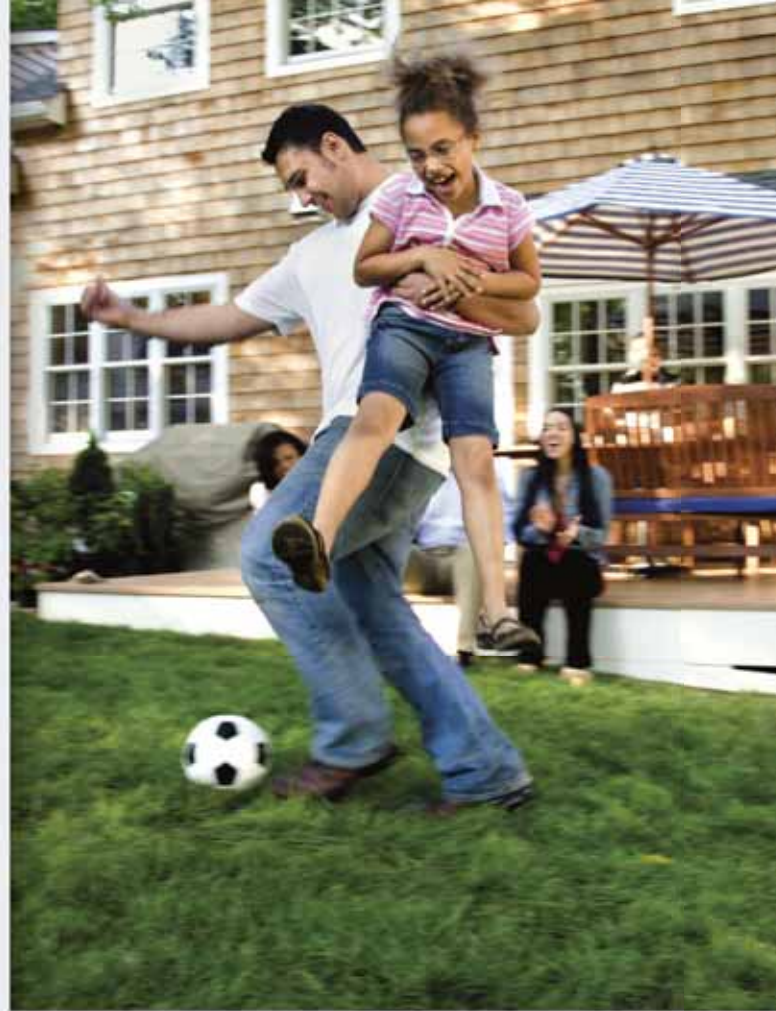

Installation is a snap with an integrated J-channel and pre-punched nailing fin standard on each window (J-channel not included on casement and awning windows). And customers can choose from a full range of glass, insulation and screen features, plus optional 3 1/4" flat casings with bull nose, paintable and stainable wood jamb extensions, and factory-mulled window units. New construction windows are available in white, almond and clay.

SLIDING PATIO DOORS

OPEN UP THE POSSIBILITIES

Our high quality sliding patio doors offer simple installation, unmatched strength and a wealth of options and features, so that each customer can find the patio door that satisfies both their budget and their personal style.

The reversible designs, pre-assembled panels and standard integrated nailing fins mean that each of our doors is a breeze to install—and to maintain. Atrium patio doors are made of the same high-grade virgin vinyl we use in our premium windows, providing virtually maintenance-free care and lasting beauty inside and outside the home.

Model 311

The Atrium Model 311 sliding door is designed to accommodate modest budgets without sacrificing stability or quality.

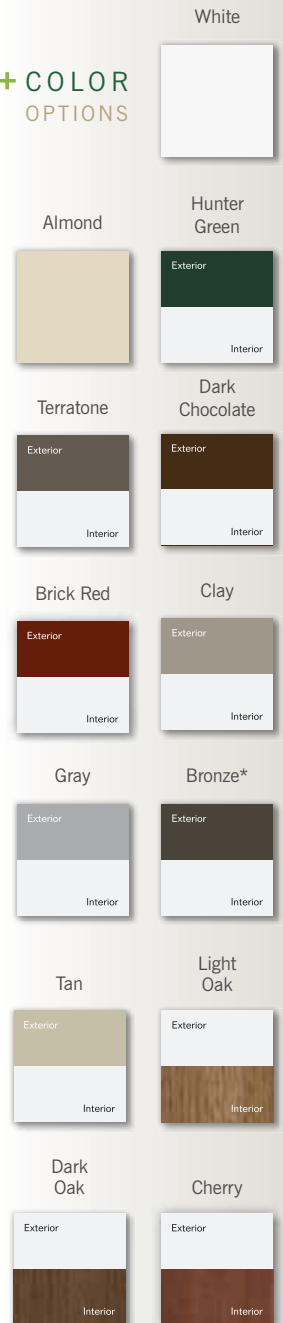

Model 312

The Atrium Model 312 offers extensive design options for glass, hardware and colors, as well as increased security and stability features.

Model 332

The Atrium Model 332 provides luxury, beauty and ultimate choice for your customers. Exclusive features include 4 1/16" jamb depth, multi-point locks, foot bolt locks, DP 50 rating for coastal applications and optional flat or brick mould J-channels for easier installation.

+ COLOR OPTIONS

Exterior painted color, interior wood finish
options and Blinds Between the Glass
available with models 332 and 312

*Bronze exterior available in paint or laminate on 312

THE VINYL ADVANTAGE

- + PVC vinyl makes for windows that never warp or need painting or refinishing, and creates tight seals that dramatically reduce drafts and energy costs.
- + During the past 20 years, PVC products have been found to perform favorably in terms of energy efficiency, thermal-insulating value, low contribution to greenhouse gases and product durability.
- + PVC is better for the environment than competing products, reducing CO₂ emissions and utilizing 20 percent less energy to produce than other plastics.
