

Our Company

Founded as Aluminum Products Company in 1946, Atrium Windows and Doors - North Carolina, exclusive manufacturer of the Atrium brand, traces its origins to Rural Hall, NC where we began as a producer of aluminum storm products. With the emerging popularity of vinyl in the 1980's, we began a transition away from aluminum and eventually completed the move in January 1995 to our current facility in Welcome, North Carolina. Today, our facility is one of the industry's leading producers of vinyl windows and sliding patio doors, serving 1200 customers throughout our 38 state distribution territory.

Our Facility

At Atrium Windows and Doors - North Carolina, we have the capacity to produce one million units annually at our 480,000 square foot manufacturing plant. Nearly 1300 people are employed with Atrium Windows and Doors - North Carolina.

Our Accomplishments

What separates us from the competition are products, service and innovation. Among our many products, we offer the model #332 sliding patio door, with a DP50 rating for strict coastal building requirements.

We are one of only a handful of manufacturers in the country with in-house vinyl extrusion capabilities. This distinction allows for immediate quality control, the reduction of external supplier dependency and the advantage of maintaining raw material cost.

We offer a complete line of replacement and new construction windows and doors with the industry's widest selection of decorative and energy efficient options available.

All Atrium products may be ordered to meet Energy Star requirements.
