

PROUDLY MADE IN TEXAS ★

OUR COMPANY

Founded in 1948 by the Fojtasek Family in Dallas, Texas, Atrium Windows and Doors began as an aluminum window manufacturer. Having spent almost a half-century perfecting window manufacturing and distribution to meet the demanding requirements and conditions of the Southwest, Atrium began to branch out. Dedicated to building a company with an uncontested reputation for quality, selection and service with an interdependent balance between the responsibility to customers and employees, Atrium expanded to multiple companies across the country.

OUR FACILITY

Atrium's heritage begins in Texas and through the growth that started here the company employs thousands of people in the United States and Canada and produces millions of units annually.

OUR ACCOMPLISHMENTS

Atrium Windows & Doors - Texas offers a comprehensive product line in both vinyl and aluminum products to supply our customers with the window material most needed and suitable in their respective markets. Primarily known for its new construction products, Atrium now offers a full line of new construction and replacement windows and sliding patio doors with a vast array of decorative and energy efficient options. We are one of only a few manufacturers in the country to use our own extrusions allowing immediate quality control and the advantage of maintaining raw material cost.

All Atrium products may be ordered to meet Energy Star requirements.
